

EP: 06

→ Understanding all about NPM

① NPM

→ it's a package manager for installing package for ourselves.

→ Package manager for java script, which comes along with node.

② Locally

③ Globally

→ When you want your dependencies to be in the project & specific

EP: 07

→ Intro to express

① Syntax is pretty good & easy to understand as compared with node.

② It is fast & secure than node.

③ Req, Res & Routing are fast & easy
